# IRONKEY™ WORKSPACE W500

**Windows 8 Compatible**

## EQUIPPING A WORKFORCE ON THE MOVE

Today's organizations are employing more mobile workers than ever before. Field personnel, consultants and teleworkers all need a mobile computing environment that gives them access to corporate applications and data, without the burden or expense of lugging a laptop.

For many enterprises, that environment is Microsoft Windows To Go, a complete Windows 8.1 Enterprise workspace that can be booted directly from a USB flash drive or other storage device to run on any PC[1], regardless of operating system. With Windows To Go, you can:

- Provide your users with an imaged and fully functional version of Windows 8.1 Enterprise.
- Distribute mobile work environments that mirror your corporate desktop.
- Ensure employees, partners and contractors are using mobile workspaces created and managed by IT.

## MICROSOFT-CERTIFIED. . .

Not every mobile Windows solution is created equal. And when you're working with corporate data and applications, you need a solution you can trust. Now there's IronKey Workspace W500 — the drive certified by Microsoft for Windows To Go that delivers a true Windows 8.1 desktop embedded in a trusted IronKey USB flash drive.

- Employees can easily telework from home.
- Consultants can work in multiple locations.
- Field personnel can access their corporate desktop from virtually any PC.

## . . . AND ENTERPRISE-CLASS

IronKey Workspace W500 is the Windows To Go solution protected by IronKey's legendary hardware encryption, and centrally managed and provisioned through the optional on-premise IronKey Enterprise Management Server and Provisioning Tool. And it builds on IronKey's renowned leadership and expertise in providing complete mobile workspaces and hardened, reliable USB flash drives.

[1] PCs certified to run Microsoft Windows 7 or higher operating systems

### WINDOWS TO GO CERTIFIED

Depend upon the Microsoft-certified Windows To Go solution that delivers a true Windows 8.1 desktop protected by a trusted IronKey USB flash drive.

### FAST, CONVENIENT AND DEPENDABLE

Rely on IronKey's portable desktop expertise and the proven dependability and exceptional performance of IronKey drives.

Equip users to work anywhere using environments that mirror your corporate desktop.

Deliver a fast, full Windows desktop that boots from USB and uses all host system resources.

### ALL THE ADVANTAGES OF IRONKEY

Protect data, applications and networks with IronKey's AES 256-bit hardware encryption and strong password authentication.

Efficiently deploy across the enterprise with optional provisioning and centralized management.

## IRONKEY 256-BIT HARDWARE ENCRYPTION PROTECTS WORKSPACES AND DATA

Control access to your company's mobile Windows To Go desktops with strong, built-in password protection capabilities and 256-bit AES hardware encryption. The IronKey Cryptochip protects your critical data, applications and networks by keeping encryption key management on the device, where it's safe and protected. Only after the user logs in with an authorized password will the drive unlock the workspace, data and applications. And with Imation IronKey Workspace devices, data and applications are automatically protected the moment users remove flash drives from their host PCs.

## ENTERPRISE-CLASS PROVISIONING AND MANAGEMENT

IronKey Workspace W500 is a mobile workspace that stands up to the demands of the enterprise. You can centrally administer up to thousands of devices with the optional on-premise IronKey Enterprise Management Server. And with IronKey's optional provisioning tool, you can quickly mount a large-scale deployment of mobile workspaces to keep up with the growth of your mobile workforce, or to prepare for potential "lights out" events that might disrupt operations.

## IRONKEY TOUGH, IRONKEY FAST

IronKey Workspace drives undergo thousands of hours of rigorous read/write tests, and we encase each one in a sturdy, tamper-evident metal chassis that's resistant to water, dust and shocks.

IronKey Workspace W500 drives are also about performance, delivering read/write performance exceeding the minimum requirements for Windows To Go devices. Users will get sequential read performance of up to 400 MB/second and sequential write speeds of up to 316 MB/second.

## THE LATEST MEMBER OF THE IRONKEY WORKSPACE FAMILY

As new IronKey Workspace solutions and options come to market, look for FIPS 140-2 Level 3 hardware encryption and strong user authentication.

## TECHNICAL SPECS

**CAPACITIES**
32GB, 64GB, 128GB

**PERFORMANCE**
Max Read:  400 MB/second
Max Write:  316 MB/second

**HARDWARE**
USB 3.0 SuperSpeed
Dust-resistant
Shock-resistant
Ruggedized

**WATERPROOF**
MIL-STD-810F

**SECURITY FEATURES**
Password protection
256-bit AES hardware encryption
Automatic data protection upon device removal

**DIMENSIONS**
82.3mm x 21.1mm x 9.1mm

**WEIGHT**
1.12 oz (32 grams)

**DEPLOYMENT TOOLS**
Windows 8.1 Enterprise
IronKey Enterprise Management Server
IronKey Workspace Provisioning Tool

**BOOTABLE OPERATING SYSTEM**
Microsoft Windows 8.1 Enterprise

**REQUIREMENTS**
PCs certified to run Microsoft Windows 7 or higher operating systems
Works with Intel-based Mac (technical support is not provided)
Requires access to Windows 8.1 Enterprise Edition (Windows 8.1 is not included or pre-loaded)

**WARRANTY**
5 Years Limited
