

IRONKEY™ ENTERPRISE MANAGEMENT SERVICE

MANAGE WINDOWS TO GO AND SECURE STORAGE CENTRALLY

Protecting your data, your mobile workforce and your organization is easy with the IronKey Enterprise Management Service. With this cloud-based secure command center, you can easily administer and police IronKey Enterprise S1000, S250 or D250 encrypted storage flash drives, IronKey Enterprise H350 and H300 hard drives and IronKey Workspace W700, W700SC and W500 drives for Windows To Go through this advanced management console.

- Take control of encrypted mobile storage and workspace solutions for Windows To Go.
- Mitigate risks of data loss.
- Enhance productivity and collaboration.

FAST, FLEXIBLE DEPLOYMENT

With IronKey's secure cloud-based service, you will be up and running within 15 minutes without the need for additional IT resources. Efficiently administrate the security of thousands of Windows To Go PC instances, or deploy and manage encrypted IronKey Enterprise S1000, S250 or D250 flash drives and Enterprise H350 and H300 hard drives. Provision and initialize devices in ways that fit how your organization works – deploy by workgroups, activate devices by email, or distribute pre-initialized devices directly to employees.

CREATE A VIRTUAL COMMAND CENTER

A single console gives your administrators an up-to-the-minute view of all applicable IronKey devices under their management, no matter where those devices are in the world. Your own dashboard presents easily scanned charts and graphs showing data about all devices under your management including user status, device status, device location and activity, device software version and more.

MANAGE WINDOW TO GO DEVICES IN THE CLOUD

Now you can manage your IronKey Workspace W700, W700SC and W500 devices with the cloud-based IronKey Enterprise Management Service. IronKey Workspace with Windows To Go is a PC on a Stick™ that equips employees and contractors with a portable Windows 8/8.1 or Windows 10 corporate image. This Microsoft-certified solution comes complete with your applications, security controls and access policies stored on a ruggedized, fully manageable USB flash drive – all at savings of up to 90% compared to the cost of laptops.

BENEFITS

- Manage IronKey Workspace for Windows To Go and Secure Storage devices from a single console.
- Deploy and manage devices easily using this cloud-based service with minimal capital expenditure.
- Monitor devices in the field with a powerful, flexible asset tracking system.
- Efficiently and cost-effectively protect devices by administering usage and encryption policies, password restrictions, and more from a central console.
- Role based administration provides flexibility and allows a single account to be leveraged by multiple groups within a single organization.
- Strengthen authentication by enabling one-time passwords and simple but secure password recovery.
- Administrators can remotely wipe or disable lost or stolen devices.
- Extensive logging including visual tools for monitor data such as geographical access via a convenient dashboard.
- Monitor devices in the field with this powerful, flexible asset management tool.

IRONKEY™ ENTERPRISE MANAGEMENT SERVICE

CENTRALLY ADMINISTER USAGE, PASSWORDS, AND MORE

Police device use and access by leveraging a broad range of flexible policy and password management controls.

- Enforce device-specific rules for password length and complexity, password change frequency, retry limits, and more.
- Enable help desk admins to easily and remotely help users who have forgotten their passwords.
- Restrict the ability to use drives on certain computers by whitelisting specific IP addresses or address ranges.
- Remotely reset devices, reset passwords, update policies, force read only mode, disable or even detonate devices from anywhere in the world.
- Control access to software pre-loaded onto IronKey Enterprise S250 or D250 flash drives, including a secure portable version of Mozilla Firefox, IronKey Identity Manager and IronKey Secure Sessions Service.
- Activate and administer optional McAfee Anti-Virus protection software on some or all of the devices you manage.
- Enable users to generate One-Time Passwords for secure authentication from leading OTP platforms.

ENSURE COMPROMISED DRIVES DON'T COMPROMISE DATA

With the IronKey Enterprise Management Service, administrators can remotely disable lost or stolen devices by locking out users and preventing password access. They can even destroy a device that a departing employee fails to return, erasing every block of data from the compromised device and destroying its on-board Cryptochip, rendering it unusable.

DEFINE AND CONTROL ADMINISTRATIVE ROLES

Help ensure that only the right people see and control device use across the enterprise by establishing and enforcing boundaries for device management.

MANAGED DEVICES

IronKey Enterprise Hardware Encrypted S1000, S250 & D250 Flash Drives

Mobile data security and regulatory compliance with military-grade encryption, strong authentication, and anti-malware defenses.

*IronKey Enterprise S200 & D200 devices can also be managed.

IronKey Enterprise H350 and H300 External Hard Drives

Next generation hard drive features USB 3.0 performance combined with extended storage capacity.

IronKey Workspace W500, W700 and W700SC Windows To Go Drives

Microsoft-certified Windows To Go solutions that deliver a true Windows Windows 8/8.1 or Windows 10 desktop protected by a trusted IronKey USB flash drive.
