

IRONKEY™ WORKSPACE

SIMPLIFY COMPLIANCE & KEEP MOBILE WORKERS PRODUCTIVE

KNOW THE RISKS OF MOBILITY.

Mobile workers are a tremendous asset for any hospital, healthcare provider, insurer or pharmaceutical company: their ability to work from anywhere holds down costs and improves productivity.

- Employees working from home.
- Contractors and practitioners working at multiple facilities.
- Field reps and support staff.

DON'T COMPROMISE COMPLIANCE.

But because mobile workers carry or access personally identifiable health information, R&D data, and your own enterprise applications and databases, their actions could compromise your ability to meet data security mandates and regulations, including:

- Health Insurance Portability and Accountability Act (HIPAA)
- Health Information Technology for Economic and Clinical Health (HITECH) Act
- Centers for Medicare & Medicaid Services (CMS) security requirements for Electronic Health Records (EHRs)
- Evolving ASTM Standards for Medical Device Interoperability

And non-compliance can be costly. In 2014, Ponemon Institute reported the number of healthcare data breaches has doubled since it began tracking them in 2010. **Those breaches come at enormous cost - as much as \$5.6 billion annually for the healthcare industry.** (Fourth Annual Benchmark Study on Patient Privacy & Data Security, March 2014)

EQUIP EMPLOYEES TO WORK FROM ANYWHERE.

Now there's a solution that equips workers with a fully functioning Windows 10 or Windows 8.1/8 protected by a trusted IronKey USB flash drive. With IronKey Workspace W700, W700SC, W500, W300 and W200 drives, you can transform virtually any computer into your employees' own personal workspace capable of using all host system resources - and certified by Microsoft for Windows To Go¹.

- Use a corporate IT Windows image, complete with all enterprise applications, from virtually any computer.
- Enable crucial hospital or corporate operations to continue during power outages, severe storms, earthquakes, fires or other disasters. Workers stay productive even if they can't make it into the office.

PROTECT THE SENSITIVE HEALTH DATA YOUR MOBILE WORKERS CARRY.

IronKey Workspace drives let you control access to your mobile Windows To Go desktops with built-in password protection capabilities and up to 256-bit XTS-AES hardware encryption. And organizations deploying IronKey Workspace W700, W700SC or W500 drives can take further control of their portable workspace devices with IronKey's optional centralized management and provisioning platforms³.

WITH IRONKEY WORKSPACE USB FLASH DRIVES...

- Doctors can securely and easily access patient data whether at the hospital, in the office or at home.
- Temporary medical and pharmaceutical personnel can use a trusted Windows environment when on assignment or when working from home.
- Clinical trial contributors, managers and auditors can securely enter or review trial data at any location with a compatible PC, tablet or Mac!
- Insurance claims adjusters, examiners and investigators can always have access to their desktops even when working in the field.
- Organizations can distribute full Windows work environments to maintain operations if severe weather or other disasters strike.
- IT administrators can enforce access and use policies from a central console.

QUICK REFERENCE

IRONKEY WORKSPACE W700, W700SC, W500, W300 & W200

PROTECTION OF SENSITIVE DATA

Problem: Breaches of sensitive healthcare data cost you more than fines and penalties. They can trigger losses in customers and revenues, and deal serious blows to your reputation and brand.

Solution: IronKey Workspace drives help protect your data and your organization by safeguarding portable desktops and patient data with password protection and up to 256-bit XTS-AES hardware encryption. In addition, IronKey Workspace W700 and W700SC drives are FIPS 140-2 Level 3 certified.² The W700SC drives also feature support for CAC/PIV smart cards for organizations in need of that standard and functionality.³

IT-MANAGED DESKTOPS AND DEVICES

Problem: When mobile workers use home computers or systems in uncontrolled environments, they risk exposing files, networks and applications to unauthorized software and malware.

Solution: IronKey Workspace flash drives let you equip users to work anywhere using environments that are provisioned and managed by IT and that mirror your organization's desktop. Optional enterprise-class administration and mass provisioning platforms give IT management the ability to control drive access and usage, set password policies and deploy large numbers of mobile workspaces.

DEVICE QUALITY

Problem: Too many USB flash drives marketed as portable workspace solutions are made with inexpensive, unreliable commodity parts.

Solution: Rugged IronKey Workspace drives undergo thousands of hours of rigorous read/write tests to help ensure users are getting a USB flash drive they can count on. Every drive is assembled in America from quality components, and is encased in a sturdy chassis that's resistant to water, dust and shocks to help protect the drive and its contents from the elements.

MICROSOFT CERTIFICATION

Problem: Solutions that haven't been certified by Microsoft can expose you to conflicts, crashes or worse, and are explicitly not supported by Microsoft.

Solution: IronKey Workspace drives are Microsoft-certified Windows To Go solutions that deliver a true Windows 10 or Windows 8.1/8 desktop protected by a trusted IronKey USB flash drive. And they're the only solutions built around Imation's portable desktop expertise and the proven dependability of IronKey drives.⁴

HIGH PERFORMANCE

Problem: Many mobile desktops are slow and hard to use.

Solution: IronKey Workspace drives are built for speed, delivering read/write performance exceeding the minimum requirements for Windows To Go devices. Users will get sequential read performance of up to 400 MB/second and sequential write speeds of up to 316 MB/second with the W700, W700SC, W500 and W300 devices and 310 MB/second read performance and 159 MB/second write speeds with the W200 devices.

IMMEDIATE PRODUCTIVITY

Problem: Mobile workers often struggle to access applications or IT assets when working in the field or at home.

Solution: The Windows To Go environment's minimal, intuitive interface gets employees working in no time. In addition, IronKey Workspace drives are compatible with virtually every system¹, so users don't have to waste valuable work time hunting down the right host computer.
